- ☐ Recipient pays on delivery

Courier Services

- ☐ Same Day & Next Day delivery
- ☐ Swap orders (give & take)
- ☐ Special date & Time order delivery

IT / IS Services

- ☐ Real Time Inventory

Sales Logistics

To meet our clients needs, we designed a new sales logistics strategy. Keeping the “old” traditional Logistics Services such as storage and distribution of goods, we went a step further and embraced the order management and merchandising with aim to unite customers and internal operations.

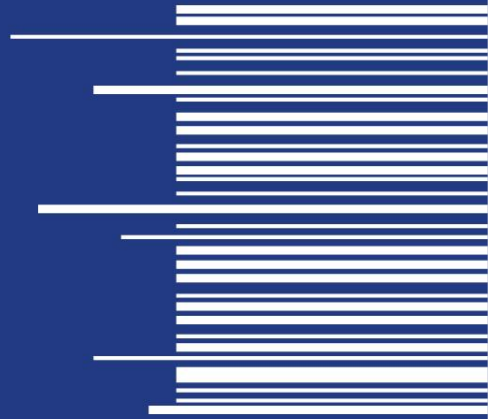

One is the main difference
between us and a commercial company:

DO's:

- ✓ Order entry
- ✓ Reserve monitoring
- ✓ Storage
- ✓ Distribution
- ✓ Invoicing
- ✓ Billing
- ✓ Planning

DONT's:

- ✓ Commercial deals

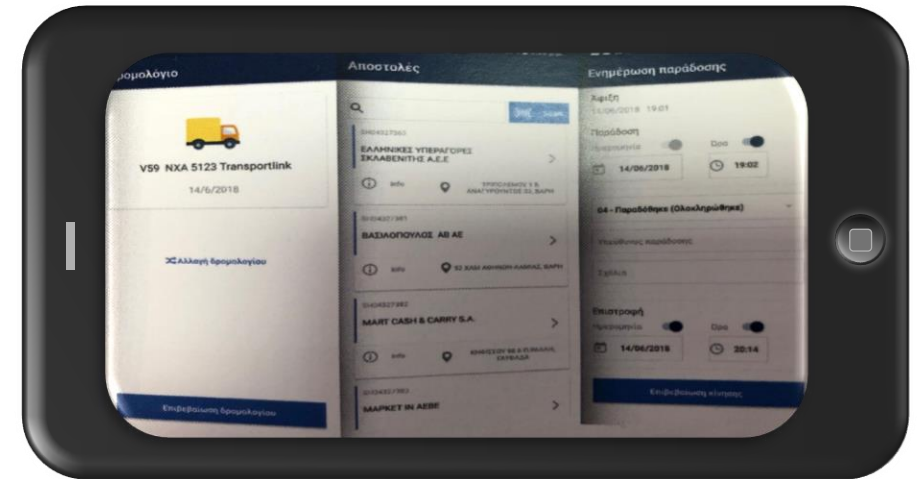

Logistics Intelligence

RTMOTO is a smartphone application for Android OS, already used in many commercial vehicles in Greece & Cyprus offering:

- ❑ Optimization of supply chain management (real time delivery status per order, partial or non-delivery information per product code)
- ❑ Effective customer service with real time information on the delivery status of orders
- ❑ Route trace recording, data collection on trip duration, distance calculation of CO2 emissions
- ❑ Route design optimization using data such as trip duration and waiting time per delivery point

Utilities :

- ❑ Google Maps
- ❑ Online/Offline usage
- ❑ Friendly interface

Paperless Logistics

Full paperless & communicationless procedures

- ☐ Paperless order from client
- ☐ Choose picking list straight from rf/voice
- ☐ Automatic assignment to picker with priority zone
- ☐ Picking lists updated by supervisor remotely
- ☐ Flexible picking process (Picking list hold & release)
- ☐ Use RT Moto for Real Time Monitoring on Truck & Orders
- ☐ Paperless delivery
- ☐ electronic invoicing

Competitive Advantage

For us:

More Efficient

Easy transaction- delivery

Benefits users (CS- Drivers)

Easy to use

Environmentally Friendly

For you:

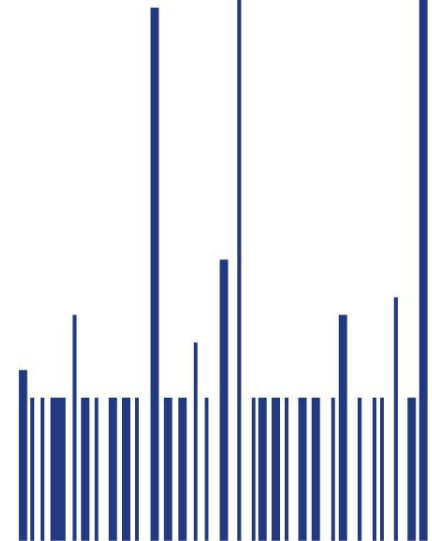

Easy access

Self Monitoring of Deliveries

No need for archiving DN

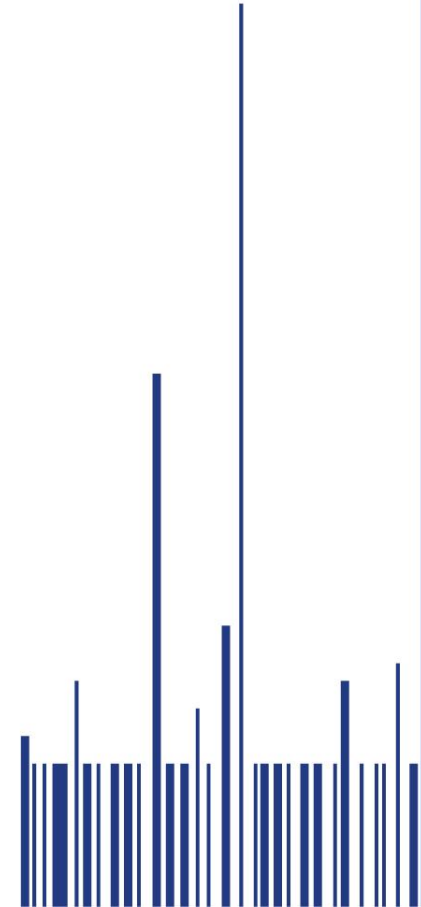

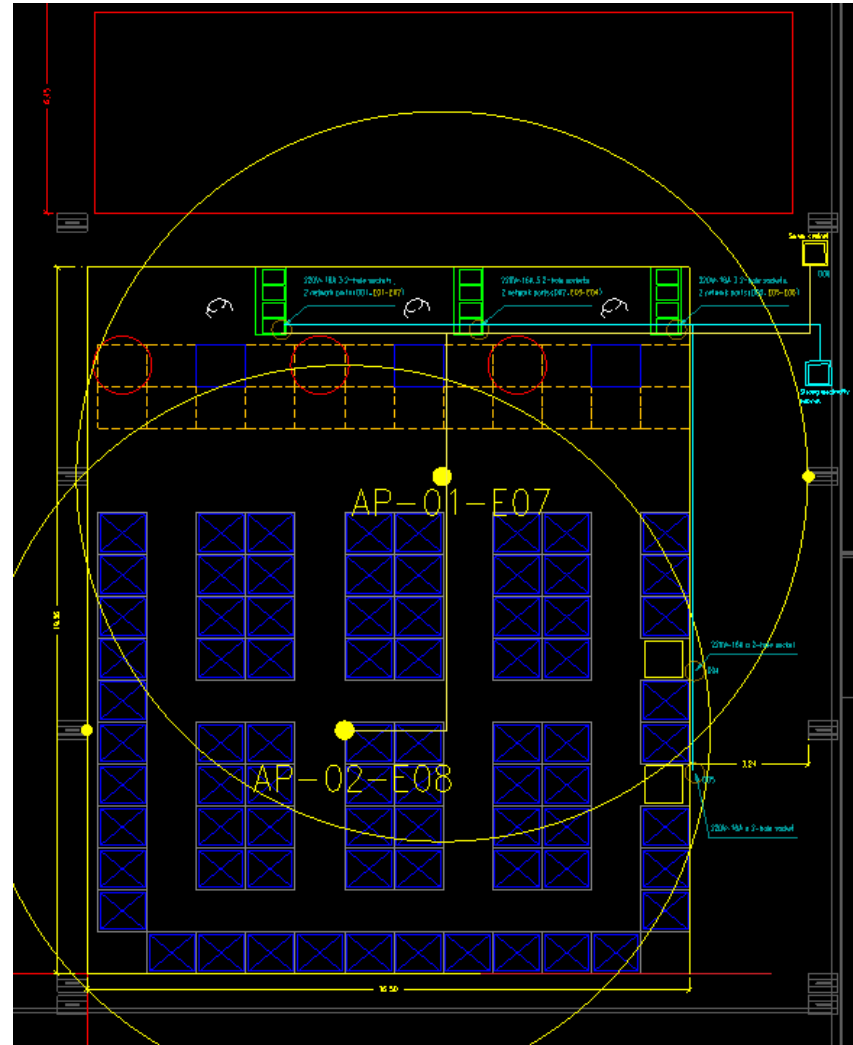

Good branding

Environmentally Friendly

“Goods-to-person” automation

FDL GROUP IS
THE FIRST TO
BRING THE
ROBOTIC
PICKING SYSTEM
“GOODS-TO-
PERSON” TO ITS
WAREHOUSE
